Firefighters Monitoring Application Usage

Improving Efficiency For Fire Departments

Mobile access to real-time data means your team stays informed and efficient. MACTRON GROUP's (MTG) Mobile Tablet PC can provide real-time information to the fire department and emergency medical services.

With MTG's MAS1011 and MAS1220 models on hand – You can improve firefighter safety and incident response via real-time valuable data sharing.

In the meanwhile, firefighters can utilize WAP2155 – Waterproof Stainless Touch Panel PC as an automated screen on the rig to run the pumps.
